Candidate String: Possible final result		Method used	Confidence
#1	"B01LER" (306)	Take top character from each results set	308 → 95% = (93+97+93+93+93+99) / 6
#2	"BOILER" (310)	Take best uppercase letter from each results set	312 → 95% = (93+97+93+93+93+99) / 6
#3	"301LER" (314) (326)	Take best number from each results set if possible, otherwise take top uppercase letter but use zero probability (318)	316 → 39% = (42+97+93+0+0+0) / 6 (324)

Figure 3 – demonstrating choosing among lookalike characters by assuming that all characters in a word are of the same type
